

# Child Care Development Fund State Administrators

## EEC CAN HELP YOU DEVELOP YOUR CCDF PLANS

Early Educator Central provides easy access to low or no-cost online health and safety training with CEU options, that states can use to build a progression of professional development options for the ECE workforce. This and other tools like the PD System Cost Analysis tool are free, which means that you have more resources available to invest in other quality activities. Whether you want to enhance your health and safety training options, support career pathways, or assess and improve classroom practice in your CCDF funded programs, Early Educator Central can help.

### Health and Safety Training Options

The courses on Early Educator Central may be helpful in meeting the new requirements under the Child Care and Development Block Grant, particularly through the Better Kid Care (BKC) on demand modules or the Virtual Lab School (VLS) courses which addresses many of the topics included in the new CCDBG training requirements for all teachers.
